Can cause eye and skin irritation. Causes respiratory tract irritation. May cause serious heart rythm distubances.

Potential Health Effects

ROUTES OF ENTRY:Inhalation, Skin absorpction, Skin contact, Eye Contact, Ingestion

EYE CONTACT: Can cause eye irritation. Symptoms include stinging, tearing, redness, swelling of eyes and blurred vision.

SKIN: May be absorbed through the skin in harmful amounts. Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis(rash). Prolonged or repeated contact may cause irritation.

INGESTION: Moderately toxic. Irritating to mouth, throat and stomach. May produce central nervous system effects, which may include dizziness, loss of balance and coordination, unconsciousness, coma and even death. Product may be harmful or fatal if swallowed. Pulmonary aspiration hazard. After ingestion, may enter lungs and produce damage.

INHALATION: High concentrations may lead to central nervous system effects (drowsiness, dizziness, nausea, headaches, paralysis and loss of consciousness and even death). Repeated overexposure has caused hearing loss in lab animals. Repeated overexposure has produced toxic effects in developing and young lab animals. Solvent "huffing/sniffing" (abuse) or intentional prolonged overexposure to high levels of vapors can produce abnormal behavior, convulsions, hallucinations, delerium, nervous system damage, serious disturbances of hearth rythm and sudden death. Prolonged or repeated exposure may cause liver and kidney damage.

REPRODUCTION INFORMATION: This material(or a component) may be harmful to the human fetus based on positive results with laboratory animal.

CARCINOGENICITY: This product could contain trace amounts of ethylbenzene, which has been shown to cause cancer in lab animals by inhalation and is listed as a suspect carcinogen by IARC.

4. FIRST AID MEASURES

EYES: Move individual away from exposure and into fresh air. Flush eyes gently with water for 15 minutes while holding eyelids apart. If symptoms persist or there is any visual difficulty, seek medical attention immediately.

SKIN: Remove contaminated clothing. Rinse exposed areas with large amounts of water. If skin is damaged or symptoms persist, seek medical attention. Launder clothing before reuse.

INGESTION: Seek medical attention immediately! Never give anything by mouth to a drowsy or unconscious person. Do not induce vomiting. If possible, do not leave individual unattended.

INHALATION: Immediately move individual away from exposure and into fresh air. Seek immediate medical attention. Keep person warm and quiet. If not breathing, begin artificial respiration. If breathing is difficult, administer oxygen.

NOTE TO PHYSICIANS: Inhalation of high concentrations could occur in enclosed spaces or during deliberate abuse could cause cardiac arrhythmias. This material is an aspiration hazard.

5. FIRE FIGHTING MEASURES

FLAMMABLE PROPERTIES:

FLASH POINT: 45 F

Method: TCC Tag Closed Cup

FLAMMABLE LIMITS: Lower 1 Upper 7.6
